Summary

Proactive and multidisciplinary Software Engineer with experience in web development and data analytics. With around 3 years of experience as a software developer and 8 years as a university instructor. Passionate about learning new technologies and staying up-to-date with industry trends to deliver value added products. Seeking a Software developer position to contribute to company's goals and push the boundaries of technology.

Professional Experience

Software Engineer, *Mckinsey & Company*

03/2022 – present | Atlanata, US

- Collaborated on the development of the McKinsey Quarterly Digital edition and McKinsey Insight store, which added over 5k of new users to our user base in the first month alone.
- Implemented unit and integration test suites that resulted in a drastic decrease in production issues.
- Identified, debugged, tested, and resolved various issues within our codebase to improve the overall quality of our application.
- Conducted A/B experiments using Adobe Analytics with my team to optimize Mckinsey.com, identifying opportunities that increased our user acquisition rate by more than 20%..

Junior software Engineer, *Axious Solutions*

12/2020 – 03/2022 | Washington DC, US

- Collaborated with senior engineers on bug fixing, feature development and testing.
- Attended training and development sessions.

Lecturer and Visiting Researcher, *Bahir Dar University, University of Calgary & Wisconsin-madison*

06/2012 – 12/2020

Bahir Dar, Calgary, Madison | ETH, US

- Taught hydraulic structure I and II courses
- Published two research articles on international journals
- Supervised 3 batches of undergraduate students.
